

If you love drawing and painting ribbon script letters, this class is for you! Our French Ribbon Script Letters are inspired by the opulent style of Marie Antoinette in stunning pastel tones and decorated with roses and sparkles of gold. These letters can be constructed with any upright script alphabet, and they are brimming with romance and elegance. We will explore the late 18th Century influences that inspired this alphabet before working on our designs. Students will be guided through the drawing, gilding and painting of these fanciful letters. Final designs will be suitable for framing as monogram designs or very special card creations. You will want to create every letter of the alphabet with this ornate style. All skill levels are welcome in this special class. Ooh la la!!!!
